GW OFFERS FREE LEGAL ADVICE TO SMALL BUSINESSES IN THE DISTRICT

WASHINGTON, D.C. -- The Small Business Clinic at George Washington University's National Law Center, the only one of its kind in the D.C. area, is offering free legal advice to Washington area residents who already own or want to start a small business or non-profit organization in the District.

Legal counseling is available for such business matters as buying and selling agreements, commercial leases, zoning problems and the organization of corporations and partnerships.

GW law students who staff the clinic are supervised by Lela Love, a lawyer and assistant director GW's division of experimental programs. The Small Business Clinic, which has been operating on a pilot basis for the past four years, recently received a Small Business Administration grant of \$33,292 and is now a permanent part of the law school's Community Legal Clinic.

The clinic has assisted small organizations such as a halfway house for former drug addicts, babysitting service, ice cream parlor, museum tour service, dance company, bakery, hairdressing studio and a variety of other profit and non-profit businesses.

The Small Business Clinic operates weekdays from 9 a.m. to 5 p.m. For information, call 676-7463.

FOR IMMEDIATE RELEASE

HOWELL NAMED FIRST GW BANNEKER PROFESSOR FOR LOCAL STUDIES

WASHINGTON, D.C. -- Joseph T. Howell, director of development for the National Housing Partnership (NHP) and planner for several HUD-financed low-income housing developments, has been named the first Banneker Professor at the Center for Washington Area Studies at George Washington University. Establishment of the center--the first of its kind in the District of Columbia--and the appointment of the Banneker Professor were both announced by Roderick French, director of GW's Division of Experimental Programs. DEP administers the center.

Howell, the author of the classic Washington sociological study Hard Living on Clay Street, will assume teaching responsibilities in the spring. For the past two years at NHP, he has been responsible for developing housing projects in the Washington and Baltimore metropolitan areas. Six of his projects are currently under construction, including the Latrobe, a 176-unit project at 15th St. and Rhode Island Ave., NW. In addition, he has 10 projects slated to begin construction by early 1981. A graduate of Davidson College, Howell has an advanced degree in city and regional planning from the University of North Carolina.

-more-

page two of two

The Banneker Professorship of Washington Area Studies is named for Benjamin Banneker, a black mathematician and astronomer who conducted much of the original survey for the new federal city in the 1790s. Those holding this professorship may represent any academic discipline, but must have conducted research on some aspect of the Washington metropolitan area. The professorship is designed to focus on research and teaching about metropolitan, as distinguished from federal, Washington.

CW's Center for Washington Area Studies provides a framework for the following activities, crucial for developing and maintaining expertise in regional studies:

- A long-term policy for acquisition of materials necessary to the study of the Washington region
- Publication of monographs and other pertinent material
- Continued sponsorship of an annual historical studies conference in conjunction with the Columbia Historical Society
- Funding of research fellowships in local studies
- Year-round course offerings relating to Washington, the Potomac Basin and the Chesapeake Bay
- The publication of a new, semi-annual review of recent scholarship, Washington Works, edited by Assistant DEP Director Linda Lear.

REMARKS TO FACULTY ASSEMBLY
AT THE OPENING OF THE FALL SEMESTER

Lloyd H. Elliott, President,
George Washington University

September 3, 1980

On the value of the liberal arts: This university remains committed to the traditions of a liberal education. I believe our course of action should be to continue to strengthen our undergraduate offerings in the liberal arts term-by-term, and that we should make it clear that we have no interest in high-pressure recruitment or catchy public relations gimmickry. Our emphasis, instead, will be on increasing the breadth and depth of the liberal studies.

To the student, we need to clarify some of the Madison Avenue rhetoric which is coming out of higher education. The liberal arts curriculum is not a candy store as some merchandisers would have us believe; and neither is it an obstacle course. Liberal learning, instead, is the bedrock of a civilized society. The student will find in the liberal arts what people down through the ages have found when they tried to be better men and women. A student will find here, too, some feeling of the human family and his or her membership in it; and we shall all learn anew that we are a part of the first human life on the planet, and if that life disappears or improves, we shall be a part of that, too.

Study in the liberal arts not only gives a student the broad base of learning, of mankind's quest for a better life, but it allows the

student to keep his or her options open. We must say again that to do well in these studies identifies a student as one who will be welcome for further study in graduate and professional schools, as one whom the wide world out there will not reject, and as one who will be better company to one's self.

It is my conviction that both now and into the foreseeable future, there will be enough candidates for this kind of education to make this university's program in the liberal arts educationally sound, financially viable, and individually satisfying.

On enrollments: We are all aware that 1980 begins a 12-year period of decline in the numbers of our population reaching 18 years of age. Since the percentage of 18 year olds entering college has been quite stable for several years now, we must, and do, expect a decline in undergraduate enrollments. I suspect our registration at GW this fall is quite important. As you are well aware, our programs at the graduate level and in the professional schools are almost all overrun with applicants. In many areas of study, well-qualified candidates must be turned away because we simply can't handle the numbers. It is, however, the registration of undergraduates, particularly in the liberal arts, which is a critical matter. We shall be watching this year's registration quite carefully to see what direct effect there is on this part of the student body because of demographic changes.

GW SIGNS AGREEMENT WITH CHILDREN'S HOSPITAL AFFECTING PROGRAMS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY

WASHINGTON, D.C. -- In a special ceremony Friday, September 5, members of the faculty and administration of George Washington University and officials and staff from Children's Hospital National Medical Center signed a far-reaching agreement affecting their programs in speech-language pathology and audiology.

The speech-language pathology and audiology discipline exists at both institutions and affiliation extends mutual advantages in service, training and research. Under the agreement, Children's Hospital will accept GW graduate-level trainees in speech-language pathology and audiology for on-site supervised practicum training. Consultive services in these fields will be exchanged, with Children's Hospital retaining total responsibility for patient care at that institution.

This agreement will increase GW's program faculty by one-half and double its clinical training capacity, providing GW graduate students with in-depth educational opportunities in an important area of developmental language disorders. It will enable GW to add significantly to educational

-more-

and research activities in children's speech and language within the greater Washington area.

Besides recognizing each other as primary affiliates in hearing, language and speech disorders in children, GW and Children's Hospital have also agreed to plan jointly for the development of facilities and programs for higher education in speech-language and hearing problems. A liaison committee will operate between the two institutions coordinating educational programs. The main administrative link is between the hospital's director and the dean of GW's Graduate School of Arts and Sciences. Cooperating in application for federal and other funding of pertinent programs is also anticipated.

In addition, members of Children's hearing and speech center staff who teach courses in their speech pathology and audiology program will be appointed to the GW faculty, subject to the approval of authorities in both institutions.

Representing GW at the signing was GW Vice President and Treasurer Charles E. Diehl; Graduate School of Arts and Sciences Dean Henry Solomon; speech and drama department chairman Lloyd S. Bowling; and speech pathology and audiology director James W. Hillis, who is also director of GW's speech and hearing clinic. Representing Children's Hospital National Medical Center was Robert H. Parrott, M.D., director; Dr. Gilbert R. Herer, director of the hospital's hearing and speech center; Burton Gray, member of the hospital's board of directors; and Peter van Roijen, chairman of the hospital's hearing and speech committee.

GW's TIDEWATER CENTER TAKES ON FULL-TIME EDUCATION FACULTY

WASHINGTON, D.C. -- George Washington University's School of Education and Human Development recently appointed its first full-time faculty member to be in residence at GW's Tidewater Center in Hampton, Va.

Dr. Suzanne Wyman has been named associate professor of adult education and human resource development and will teach, counsel and work to broaden program offerings at the center.

With nine years in counselor and teacher education, Wyman, who came to GW from Old Dominion University in Norfolk, Va., has expertise in career/life planning education and services for the handicapped.

She received her Ph.D. in counselor education in 1974 at the University of North Carolina at Chapel Hill. From 1974 until joining GW, she was assistant professor of guidance and counseling at Old Dominion where she served two years as graduate program director of guidance and counseling. She is active in numerous professional organizations and is currently president of the Hampton Roads Personnel and Guidance Association.

The Tidewater Center offers a master's degree in education and human development in adult education, higher education, human resource development, and supervision and human relations and an education specialist degree in administration, adult education, higher education and human resource development.

MEMPHIS TRAVEL AGENT FIRST TO RECEIVE GW TOURISM DEGREE

WASHINGTON, D.C. -- Memphis travel agent Elizabeth Porter is the first of a special group of travel agents and professionals from around the nation to complete requirements at George Washington University for a Master of Arts in Education and Human Development: Tourism Development and Travel Administration. Her successfully defended thesis topic was "Memphis Tourism Resources."

Travel agents from points throughout the nation periodically assemble at GW for intensive two-week courses during a two-year period. This course of study is presented by GW's travel and tourism program in cooperation with the Institute of Certified Travel Agents.

The owner of American Travel Service in Memphis, Porter is a certified travel counselor and a life member of the Institute of Certified Travel Agents. "She hopes," says program director Bruce Peters, "that her thesis will provide guidelines for tourism development in Memphis, Tennessee."

CONFERENCE ON THE DISABLED TO BE HELD AT GW

WASHINGTON. D.C. -- As part of a pledge of support for the 1981 International Year of Disabled Persons, George Washington University's School of Education and Human Development will co-sponsor a conference Sept. 24-26 entitled "The Interface of Special Education and Rehabilitation: A Continuum of Commitment."

Birgit Dyssegaard, head of the department of special education for the county of Copenhagen, Denmark, will deliver the keynote address at 8:15 p.m. Sept. 24 at the Sheraton National Center, Arlington, Va., where the conference will be held.

The conference, also co-sponsored by the World Rehabilitation Fund, will feature a reception at the Danish Embassy from 6-8 p.m. Sept. 25.

In proclaiming 1981 the International Year of Disabled Persons, the United Nations called upon each of the world's nations to establish goals and programs aimed at improving the lives of disabled citizens.

GW LAW DEAN TO SPEAK AT CAPITOL HILL RECEPTION

WASHINGTON, D.C. -- Jerome A. Barron, nationally recognized First Amendment scholar and dean of George Washington University's National Law Center, will be the featured speaker at a special reception for GW law alumni on Capitol Hill, Wednesday, September 24. Dean Barron's speech, "A House for Our Future," will be given at 5:30 p.m. in room S 120, Capitol Building.

Barron, a GW law faculty member since 1965, became dean of the National Law Center last year. He will discuss new ideas and programs for the law school, including the rebuilding of its physical plant.

In addition, The Honorable Murray Zweban, U.S. Senate parliamentarian, will receive the GW Law Association professional achievement award. Zweban is a 1959 alumnus of the National Law Center.

FOR IMMEDIATE RELEASE

STEFAN SCHIFF FINDS ART IN MINIATURE

"Button, button, who's got the button?"

Say this hackneyed phrase around Stefan O. Schiff, chairman of George Washington University's Genetics Program, and you'll be met with a loud bellow. You see, Schiff is a button collector--he has 12,000 of them--and he's heard that refrain more times than he wants to remember.

It sounds quite natural for a biologist, who is given to dividing and itemizing and categorizing things, to be a button collector, but for Dr. Schiff there's more to the third largest collecting hobby in the U.S.--behind coins and stamps--than that.

Schiff is an art lover and it's to the artistic aspect of buttons that he has devoted a book, Buttons: Art in Miniature, published in April. "Button collecting is not like coin collecting, where you're trying to get one of each kind or date," he stresses, "because with many of the antique buttons only one set was made.

"Usually a wealthy man would go to his tailor and order a set of buttons for a special coat. Sometimes the design on each button was different. All were handmade before 1850. It was one of the favorite pastimes for ladies in the 19th century to paint buttons, and many

famous artists, particularly court artisans, painted miniature buttons. Some were even commissioned by very famous artists and signed. So they really are works of art."

It's hard to get Schiff to single out a favorite button among his collection, which has been nearly 10 years in the making. A small circle of special ones, he admits, includes an 18th-century Wedgwood mounted in steel, a gold button dating back to the 16th century which belonged to a Hungarian general and is decorated with opals, pearls, garnets and enamel work, a hand-carved ivory button and some painted porcelain ones.

Schiff's most valuable button is an 18th-century sulphide made by pressing a particular kind of clay compound into the back of melted glass to create a picture. When the clay compound cools, it leaves a silvery, whitish design in the glass. "The method has never been perfectly duplicated," he explains.

Schiff was recently elected president of the Martha Washington Button Club in Washington, but he places the "hotbed" of the button collecting world further north, particularly in the New England states which have the greatest concentration of collectors and dealers. He estimates there are 30,000 button collectors in the U.S.

A converted coin collector, Schiff started collecting antique buttons when his daughter admired a button bracelet. The woman wearing it took Schiff to a button dealer, and when the dealer retired, he bought out her stock. Since then, he has acquired buttons from dealers, flea markets and antique shops, but he's not above asking if he can hunt through grandmother's old sewing box.

Winner of 13 awards in National Association of Button Collectors competitions, Schiff received three first-place awards for his 18th-century buttons, glass buttons and buttons depicting birds.

He has 24 walnut trays of buttons on display in his home. The rest, he says, are in filing cabinets. "If I had them all out we could decorate the whole downstairs," Schiff says. He also has a library of about 25 books on buttons, most of which are out of print. Schiff's wife Frances, who he says doesn't share his enthusiasm for collecting, nevertheless enjoys his hobby since she gets first choice of duplicates for sewing.

Buttons Sidebar

Excerpt from Buttons: Art in Miniature by Stefan O. Schiff.
Copyright 1980 by Lancaster-Miller Publishers, Berkeley, California.
Used by permission.

Before 1800, the few buttons made in America were produced by a scattering of silversmiths and metal artisans. By the turn of the century, small pewter buttons were being made by a number of individuals in the New England States. From about 1820 to 1850, many beautiful brass buttons, often heavily gilt, were produced by a handful of manufacturers in the northeastern United States. Continued imports from Europe throughout the century enhanced the variety of buttons, and made them common enough to be available to almost everyone.

As time progressed, buttons became larger and more ostentatious, with the male of the species sporting the most elaborate specimens. This trend continued until the French Revolution, after which anything lavish, including buttons, was abhorred for a time. Cloth buttons replaced many of their elaborate counterparts. In the 19th century, buttons became much more common, due largely to improved manufacturing techniques and a great increase in diversity of materials used to make buttons. As the century progressed, buttons again became larger and more ornate. These trends reached their peak in the 1870-1900 period, when "picture" buttons became popular and were manufactured in large numbers. It was not until this time that fancy buttons on women's apparel began to "outshine" those worn by men.

In the United States, buttons were scarce during the early colonial days. Those who could afford such extravagances imported them from England and France, and the button styles consequently reflected the ornate fashions abroad. The buttons found in America during the latter part of the 18th century were usually large, and were made of hand-chased copper or brass, steel, and many combinations of metal with other materials, especially glass. These buttons are collectively referred to as "Colonials," although they were not restricted to America and were used in the early 19th century as well. At the same time, buttons made of ivory, wood, porcelain, cloth and mother of pearl were also available.

NEW MASTER'S DEGREE IN TOXICOLOGY OFFERED AT GW

WASHINGTON, D.C. -- A new master's degree in chemical toxicology--the study of adverse effects of chemicals such as drugs, insecticides, water or air pollutants and food additives--has been added to the curriculum at George Washington University. The program is a joint offering of the chemistry and forensic sciences departments. Students are being accepted for the spring semester beginning in January 1981.

The graduate program, leading to the Master of Science in Chemical Toxicology, recognizes the interdisciplinary nature of toxicology and includes courses from related disciplines such as biochemistry, pharmacology and physiology as well as toxicology.

Job potential for graduates of this program exists in federal government agencies and departments concerned with safety of substances that must be evaluated experimentally, such as the Environmental Protection Agency, the Food and Drug Administration and the Department of Agriculture; drug companies that must demonstrate their products' safety; and the chemical industry.

For more information on this new program, contact Nicholas Lappas, 676-7319.

COURSE IN IMPROVING RELATIONSHIPS
THROUGH COMMUNICATION OFFERED AT GW

WASHINGTON, D.C. -- Are you interested in improving your relationships with other people? You can learn positive ways to communicate in problem situations to avoid anger, defensiveness and resentment. Practice constructive verbal and non-verbal communication skills during a six-week non-credit course in "Interpersonal Competency Techniques" offered by George Washington University. Classes run from October 14 - November 18. For more information, call 676-7036.

TWO-CAREER FAMILY COURSE OFFERED AT GW

WASHINGTON, D.C -- So you're not the Norman Rockwell nuclear family of the 1950s anymore? You're both bringing home the bacon and washing the pans too? And there are conflicts, right? Who takes care of the sick child? What happens when one of you gets a job transfer? These questions and more are the subject of a four-week non-credit course called "The Two-Career Family" at George Washington University. Classes begin October 6. For more information, call 676-7036.

DIMOCK GALLERY--THEMES AND IMAGES IN PRE-COLUMBIAN ART

WHAT: PRE-COLUMBIAN WORKS IN CERAMICS
INCLUDING ARTIFACTS FROM THE GW
PERMANENT COLLECTION. GIFT OF
STEPHEN A. SPEAR AND LOANS FROM
PRIVATE COLLECTORS

WHEN: THURSDAY, OCTOBER 9 THROUGH
FRIDAY, NOVEMBER 7

WHERE: DIMOCK GALLERY, GEORGE WASHINGTON
UNIVERSITY, OFF THE LOWER LOUNGE
OF LISNER AUDITORIUM, 21st and
H STREETS, N.W.

WASHINGTON, D.C. -- "Themes and Images in Pre-Columbian Art," the October 9-November 7 exhibition in George Washington University's Dimock Gallery, highlights the recent gift to the university of Mayan ceramics from the collection of Stephen A. Spear, Esq. The show will include loaned artifacts of major importance from private collectors Mr. and Mrs. Wayne W. Parrish and Mrs. Doris Franco Glanden.

The exhibition will feature clay figurines, incense burners, bowls and whistles from the Spear collection, which is largely Mayan. Figure sculptures from Colombia and Ecuador and golden ornaments from the Muisca and Tairona cultures will be shown, as well as pre-Columbian Mexican art other than Mayan. Relevant photographs and maps will augment the exhibit, which will be divided into sections on the various media of gold and clay, the human image, the animal image, abstract images, and

page two of two

the urban centers of Mayan civilization.

The catalogue for the exhibition has been prepared by Barbara Von Barghahn, GW assistant professor of art. Much of the research for the exhibition was done by GW students.

The Dimock Gallery, off the lower lounge of Lisner Auditorium, 21st and H Streets, N.W., is open to the public without charge from 10 a.m. to 5 p.m. Monday through Friday.
